

Reading Grid References

Activity

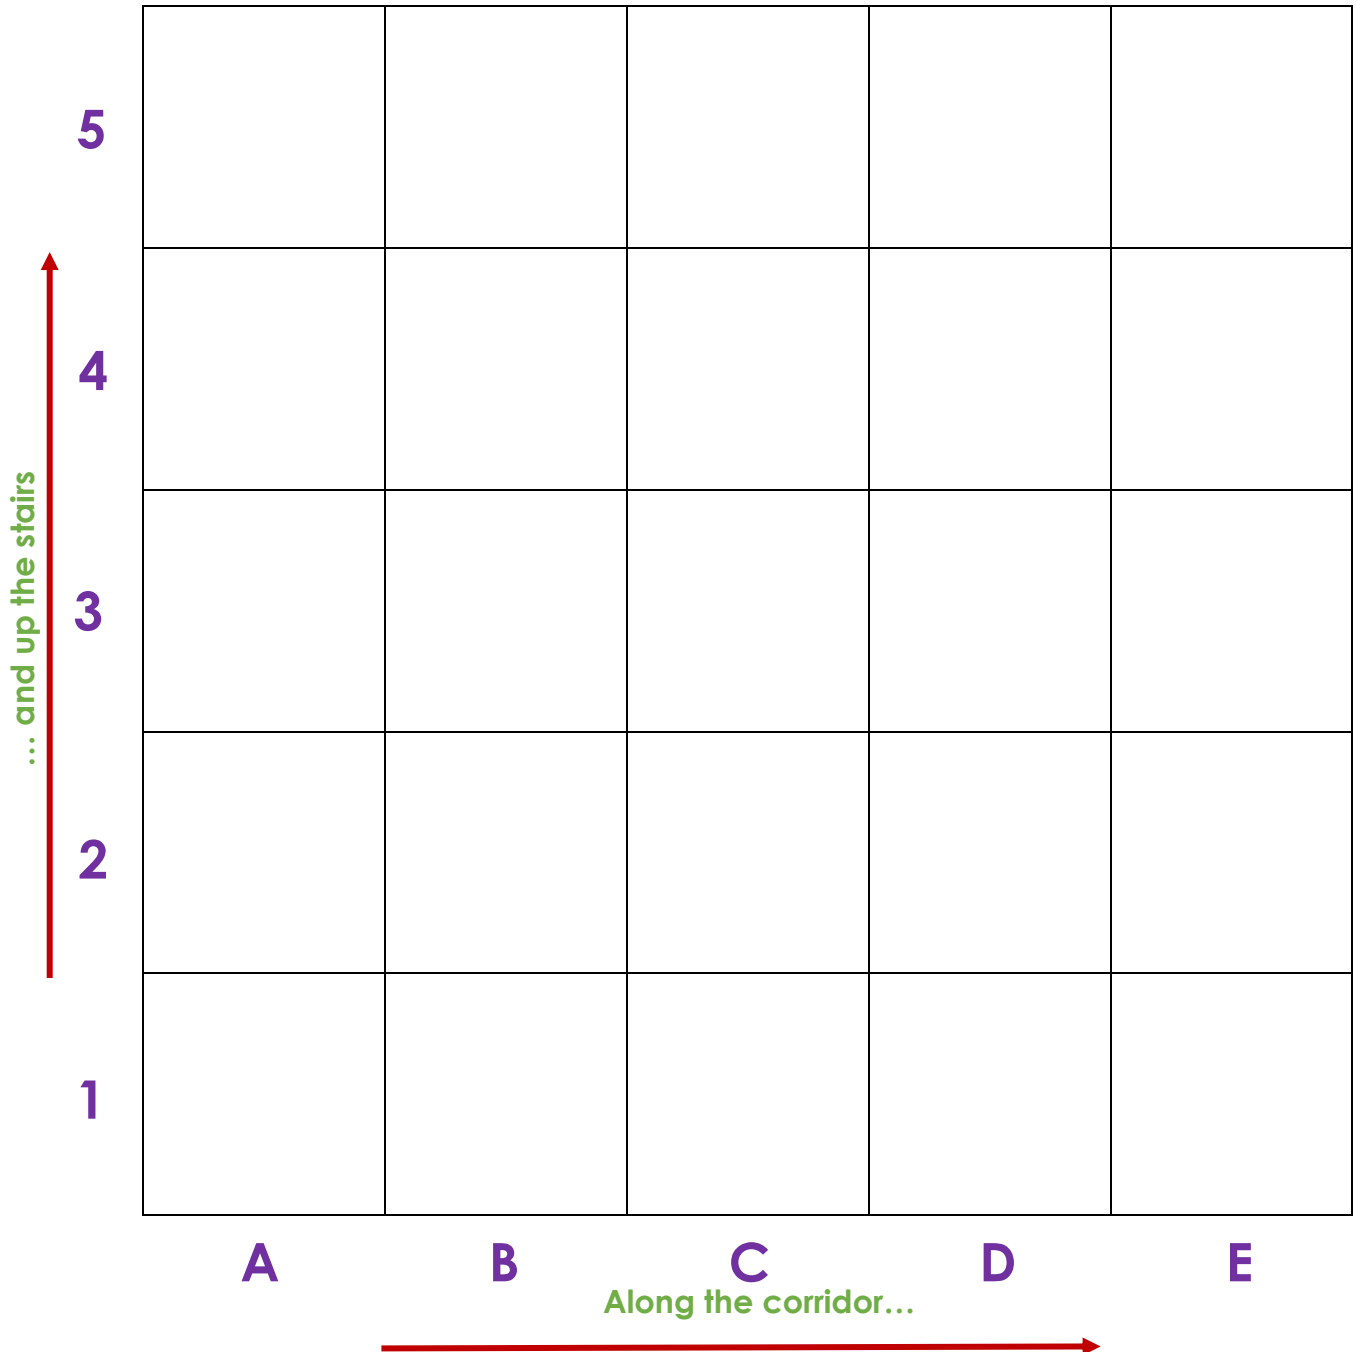

Can you find the Grid Reference for each of the animals in the grid? The first part of the Grid Reference is the letter along the bottom. The second part is the number up the side. An easy way to remember this order is by saying “**Along the corridor, and up the stairs.**” We've done the first one for you!

Frog	C 2	Duck	
Squirrel		Fox	
Deer		Fish	

Make your own grid!

Use the grid below to draw your own pictures in, then see if you can find their Grid References.

Idea!

Do you have an outdoor space? Why not draw a grid with chalk on the floor and put your toys in some of the squares? This is a great way to practice finding Grid References!
